Education

Bachelor of Technology in Computer Science and Engineering	2022 – Present
VIT Bhopal University, Bhopal, Madhya Pradesh, India	CGPA: 8.54/10
Senior Secondary Education (Class XII, CBSE)	2020 – 2021
Arwachin Bharti Bhawan Sr. Sec. School, Vivek Vihar, Delhi	Percentage: 87%
High School Education (Class X, CBSE)	2018 – 2019
Guru Harkrishan Public School , Loni Road, Delhi	Percentage: 94%

Technical Skills

Languages: HTML, CSS, Python, Java, JavaScript, TypeScript, C, SQL

Frameworks and Libraries: React, Nextjs, Scikit-Learn, Matplotlib, Pandas, Tailwind, PyTorch

Databases and ORM: MongoDB, PostgreSQL, Redis, Prisma ORM, Neo4j

Authentication: Clerk, NextAuth, OAuth, Passport.js, JWT

Tools and Platforms: Git, VS Code, PyCharm, IntelliJ, Canva, Linux, AWS, Figma, Tableau

Experience and Achievements

Splunk Build-a-thon	5th Place Winner
a Cisco Challenge	
Awarded for developing "Compliance Track", an innovative reporting and compliance tracking application for the Splunk ecosystem, secured \$400 prize in competitive App Dev track.	

Projects

Zenith - AI Career Coach | Live

Next.js, TypeScript, Inngest, Gemini AI, Clerk, PostgreSQL, Prisma ORM, Shadcn/ui, TailwindCSS

- Provides personalized, AI-powered, adaptive skill assessments, resume/cover letter generation, and tailored career insights
- Users can stay updated with evolving skill demands and market trends through progress reports. A responsive user interface that is easily accessible, boosting the user return rate by 20%.

Eventra | Live

Node.js, TypeScript, JavaScript, PostgreSQL, Google Cloud (Calendar API), OAuth2, Prisma ORM

- Built a production-ready MCP server, enabling seamless calendar integration for large language models with both local and public (network/SSE) access modes.
- Delivered APIs to fetch and create calendar events directly through a user prompt, supporting scalable web-based LLM clients and real-time updates via Server-Sent Events (SSE) transport.
- Built a secure OAuth2 authentication system for persistent sessions and managed encrypted token storage in a SQL database for data integrity and credential management.

Parkinson Analyzer – Research

Python, Scikit-Learn, Matplotlib, CNN, RNN

- Developed a machine learning platform for Parkinson's disease diagnosis using voice, spiral, and wave data, achieving 98% accuracy with CNN and RNN models on 1,000+ patient datasets.
- Created Matplotlib visualizations to support medical diagnostics and enhance research analysis.

Extracurriculars

- Coordinated Linpack Club events, served as Lead of Design Team, successfully conducted 2 events engaging 200+ student participants .
- Created ELT connector for Airbyte open source community reward programme
